"Several Hope merchants have individually called me today and each told me that he was authorized to speak for the merchants of Hope. Also, I have received some tele grams from wholesale grocers and some retailers, asking that I change my vote from 'No' to 'Aye' on S. B. No. 115, a copy of which is herewith

"Will you please analyze this bill and express your views to your reader so that not only wholesalers and retailers, but consumers, may know what this bill is about?

"I hasten to add that the revenue commissioner tells me that if this is enacted into law, it will be necessary that he employ not fewer than eight enforcement officers to go out and call on the various wholesalers and retailers, check their records, etc., in an effort to enforce this

"I voted against the bill because it seems to go to the very basis of destroying our form of government and is a trend toward more and more regulations by centrally located 'snoopers.'

'I am certainly willing to listen to the people who elected me to represent them, but more and more we are finding that we must say 'No' to many of these demands that have the trend to over-regulate our people. One great man has said that the least-governed is the bestgoverned.

"If I am wrong, I am willing to change because I am the only voice our people have in the Arkansas Senate, but somehow I can't keep from thinking that if the people who are asking me to vote for this bill could read some of the underscored sections, they would literally rebel against it.

Having faith in your ability to analyze, I trust you will give the readers some of your views and some enlightenment upon the pro-visions of this proposed law. Very sincerely,
